

Logo Guidelines

Here are some rules and guides to follow when using our logos in different environments.

The BRYTER logo should either be used on a full white or black background. The logo should not be scewed, rotated or distorted in any way.

On top of that, the logo should not be placed on the bottom of the page/visuals. Make sure to place the logo either in the top left or top right to properly follow our guidelines.

Use this as a guide when placing the logo into an environment with more surrounding components.

When placing another logo next to it, make sure to keep the safe space between it as it is shown in this visual.
